

Περιγραφή:

Dear LWW Total Access Subscriber:

With site license access to backfiles (from Volume 1, Issue 1 to the final issue of 1999) from more than 220 journals in everything from nursing and infectious disease to cardiology and surgery, the LWW Journal Legacy Archive should be an integral part of your institution's e-journal holdings.

You'll discover seminal and highly cited articles presenting pioneering research that has helped transform the practice of medicine and healthcare, including:

- Important literature on how E-coli infections spread in children

- The establishment of a pediatric Crohns-Disease Activity Index

- Results of a physician's survey on echocardiographic measurements

- The introduction of the Injury Severity Score, which emergency care professionals use to quickly evaluate victims of multiple injuries

As a LWW Total Access subscriber, you'll get the entire run of many journals that were introduced decades and even centuries ago. These include the American Journal of the Medical Sciences, first published in 1827, and Medical Care, the official journal of the Medical Care section of the American Public Health Association, which dates from 1963.

At just over 4 million pages—that's nearly 1 million articles!—the LWW Legacy Archive saves you more than one mile (1.6 kilometers) of valuable library shelf space!

And at less than 2 cents per page, far less than competitive archive products, LWW Legacy Archive is a must-have for your electronic library collection.

Contact Ovid Today and Save

Order by December 15, 2006 and save 10%—plus, you won't have to pay the maintenance fee for the first two years!

Regards,

Ovid Technologies
